5320 - 122 STREET
EDMONTON, ALBERTA, CANADA
T6H 3S5

FOREWORD

The purpose of this bibliography is to bring under one cover the titles of all forest entomology research publications originating from the Canadian Forestry Service (or its predecessors) up to 1977 within the three prairie provinces. Prior to centralization in Edmonton, forest entomology research was carried out in a number of locations at different periods of time: Indian Head, Saskatchewan; Winnipeg, Manitoba; and Calgary, Alberta. Consequently, forest entomology publication lists were fragmented. The bulk of the titles originated in the 1950's and 1960's; work is continuing today on a reduced scale. The majority of the earlier publications are no longer available for distribution.

We are publishing this report in the belief that it will be of both interest and use to forest entomologists. While considerable effort was made to locate all references, undoubtably some have been overlooked. We would appreciate being notified of omissions.

G.T. Silver
Regional Director of Forestry
